2. Claims 2-11, 13-38, 40-51, 55, 57-59, and 61-68 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the steps or means "determining a center frequency based on the fixed lower corner frequency and a baud rate, wherein the center frequency is determined by f_c " (baud rate + excess bandwidth)/2 + fixed lower corner frequency", when such center frequency is considered within the specific structure of the method recited in claim 11 or the device recited in claims 22, 23, and 33. The prior art of record fails to teach or make obvious the steps or means "varying a ratio of packets communicated from each buffer associated with the plurality of CPE modems as a function of the step of monitoring", when such ratio of packets is considered within the specific structure of the method recited in claim 42 or the device recited in claim 63. The prior art of record fails to teach or make obvious the steps or means "forwarding a plurality of information packets in a burst to the plurality of

CPE modems, a wherein each of the plurality of information packets is addressed with the single different CPE selector identifier which identifies one of the plurality of CPE modems as an intended destination", when the forwarding is considered within the specific combination of steps recited in the method of claim 46. The prior art of record fails to teach or make obvious the steps or means "generating a reply burst of a plurality of packets to each polling sequence addressed to the learned CPE selector identifier", when the generating is considered within the specific combination of steps recited in the method of claim 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
